Description

Vectron's VT-802 Temperature Compensated Crystal Oscillator (TCXO) is a quartz stabilized, CMOS output, analog temperature compensated oscillator, operating off either 2.5 or 3.3 volt supply in a hermetically sealed 5.0x3.2 ceramic package.

Features

- CMOS Output
- Low Power
- Output Frequencies to 50 MHz
- Low Jitter Fundamental Crystal Design
- Hermetically Sealed Ceramic SMD package
- Product is compliant to RoHS directive  and fully compatible with lead free assembly

Applications

- WiMAX, Wi-Fi, Wi-LAN
- Wireless Communications
- Base Stations
- Point to point radios
- Broadband Access

1. The VT-802 power supply pin should be filtered, eg, a 0.1 and 0.01uf capacitor.
2. The Output is DC coupled.
3. The Output is active if the Enable Disable is left open.

Maximum Ratings

Absolute Maximum Ratings and Handling Precautions

Stresses in excess of the absolute maximum ratings can permanently damage the device. Functional operation is not implied or any other excess of conditions represented in the operational sections of this data sheet. Exposure to absolute maximum ratings for extended periods may adversely affect device reliability.

Although ESD protection circuitry has been designed into the VT-802, proper precautions should be taken when handling and mounting, Vectron employs a Human Body Model and Charged Device Model for ESD susceptibility testing and design evaluation.

ESD thresholds are dependent on the circuit parameters used to define the model. Although no industry standard has been adopted for the CDM a standard resistance of $1.5 \text{ k}\Omega$ and capacitance of 100 pF is widely used and therefore can be used for comparison purposes.

Table 3. Maximum Ratings

Parameter	Symbol	Rating	Unit
Storage Temperature	T_{STORE}	-55/125	$^{\circ}\text{C}$
E/D Voltage	E/D	$0/V_{DD}$	V

IR Reflow

Suggested IR Profile

Devices are built using lead free epoxy and can be subjected to standard lead free IR reflow conditions shown in Table 5. Contact pads are gold over nickel and lower maximum temperatures can also be used, such as 220C.

Table 5. Reflow Profile		
Parameter	Symbol	Value
